

TRAIN THE TRAINER LIFT TRUCK OPERATOR TRAINING TWO DAY COURSE

This two day course has been developed for companies that have various types of material handling equipment; including the Sit Down Rider Lift Trucks, (LP Gas and Electric), Stand Up Narrow Aisle Lift Trucks, Powered Pallet Trucks, Battery Charging Stations, Lift Truck Attachments, and Scissors or Aerial Equipment. This intensive program includes hands-on operations on each type of lift truck and covers, in detail, each operators training program. We will utilize our 385 page, 21 chapter training manual. Two safety videos are included with the class materials along with each trainee being evaluated and receiving their own operators license.

CLASS CONTENT:
